

Veterinary Acupuncture  
and Physiotherapy

## *Injuries and Chronic Pain, Laminitis and Respiratory Problems - the Holistic Approach for Horses*

An interesting evening talk and demonstration at King's Equestrian, Bromyard will provide owners with an understanding of how problems arise, how management can help in prevention and how herbs and acupuncture can help.

Whether a horse is healthy or sick is determined by complex processes in the body and brain. Iris Ege uses her background as a vet to explain and improve understanding of the responses of the horse. In cases of Laminitis and Respiratory Problems, management by the owner can make a big difference. As an example for the team approach in rehabilitation, tendon injuries will also be discussed.

Herbs treat a broad range of conditions gently and effectively. Some can be safely harvested and used to prevent or even treat stomach ulcers. The skilful formulation of a herbal prescription and sourcing good quality extracts is important.

*To find out more visit the talk at 6pm on the 24<sup>th</sup> October at King's Equestrian, Winslow, Bromyard HR7 4SR. This will be followed by two acupuncture demonstrations in the arena. Tickets are £7 in advance and £10 on the day.*
